## About Our Company ...

### SERVICES & CAPABILITIES

- ✓ On-Site Consultations
- ✓ System Design & Layout
- ✓ Dismantle & Relocation
- ✓ Reliable Installations
- ✓ Equipment Brokerage
- ✓ Project Management

### Storage Systems

We can help you with design assistance for all types of storage systems, from small parts storage to moving and storing full pallet loads. We can provide equipment for selective pallet rack, drive-in rack, push-back rack, cantilever rack, carton & pallet flow systems, bulk storage racking, and steel shelving in all sizes & configurations. We also provide specialty small parts storage systems for manufacturing, machine shop, automotive, and fulfillment operations.

### Conveyor Systems

Our conveyor system experience begins with simple gravity flow systems and extends to fully automated high speed sortation systems, including controls, software design and implementation. We provide gravity roller & skatewheel conveyors, horizontal & inclined belt conveyors, live roller conveyors, overhead chain conveyors, cleated parts conveyors, plastic chain belts, and custom designed conveyors for your special applications.

### Mezzanines

Mezzanines are available in many configurations to provide more efficient use of your warehouse space. Clear span construction allows any operations under or on the mezzanine. Rack supported mezzanines allow mixed use above & below. Shelving or bulk rack supported carry the shelf storage configuration to the upper levels. We will custom design a mezzanine to suit your needs, providing the best materials & style for your application. We can handle the entire project from concept to completion.
