

PALLET STORAGE RACKS

We Can Supply All Major Brands!

Teardrop, Keystone, Husky, Interlake, Speedrack, Kingway, Sturdi-Bilt, Unarco, Webb, Prest, Frazier, Paltier, USP, Cardinal, Hi-Line, Ridg-U-Rak, Penco, Palmer-Shile, Republic, Bulldog

Selective Rack

Provides direct access to any pallet in the system. This is the most common rack style; very flexible configuration, but requires more aisles than other rack styles. Easy installation.

Full Access to your products!

Push-Back Rack

Supports pallet loads on moving carriages that slide back to accept the next load. Can be set for 2 to 4 pallets deep; good storage capacity with fewer aisles. Ideal against a wall.

High Density Storage - First In / Last Out

Furniture Rack

Uses decked, cantilevered shelves with no upright supports in the front, giving full access to continuous shelf levels for efficient storage of items of different lengths & shapes.

Wide, Solid Shelves for Storing Furniture

Drive-In/Thru Rack

Consists of lanes with angle support rails on the sides. Product is driven to back of lane and stocked from back to front, bottom to top. Can also be unloaded from rear, in Drive-Thru.

High Density Storage - FILO or FIFO

Pallet Flow Rack

Load pallets from the rear of the system, and conveyor flow rails allow pallets to flow to the front for removal. Provides dense storage with product rotation.

High Density Storage - First In / First Out

Wire Racking Deck

Provides a clean, safe deck surface capable of supporting full pallet loads. Protects against falling product, or poor pallet placement. Use in areas where wood decking is not recommended.

Clean & Safe Support for Products!

SPECIALTY STORAGE RACKS

Carton Flow Rack

Stores boxes in a First In/First Out (FIFO) order. This allows for automatic stock rotation, picking & restocking at the same time, less travel time per order, & for more efficient order picking!

Call us with your requirements!

Stacking Racks

Offers the density of Drive-In or Push Back rack, with the flexibility to arrange layouts to suit your needs. When storage is not required, frames collapse to save space. Many sizes to fit your application.

Many sizes & styles available!

Reel Racks

Designed for efficient storage of heavy reels of wire or cable. Can be customized to fit your reel sizes: from small wire spools to heavy 4' diameter cable reels.

Call us for more information!

Rack Repair Frames

Replace the front of your damaged upright frames without taking the rack down. Just remove the weight on the rack, cut out damaged section & bolt in replacement frame.

Replace damaged frames and add STRENGTH!

Multi-Level Picking System

Allows use of full building height to maximize space. Conveyors deliver picked orders to a common processing area & remove trash from upper levels. Two & three tier layouts available.

We will custom design to meet requirements!

Cantilever Rack

Stores long or oddly shaped loads that don't fit on standard pallets. Typically used for storage of lumber, pipe, structural steel, crated materials, etc. Single- or Double-Sided with adjustable arms.

We can help you with your layout!

Rollout Shelves

Heavy duty shelves roll out from the rack frame to allow full access to the product for lifting w/ overhead devices or forklifts. Capacities range from 1,000# to 3,000# per shelf. Ideal for heavy molds & dies.

Easy access to heavy loads!

Accessories

M-Dividers Row Ties Support Bars Protectors

We provide custom accessories on request!

BULK RACK & SHELVING

Steel Shelving

Bolted or Adjustable shelves, available in a wide variety of sizes w/ capacities from 200# to 600# per shelf. Options include closed sides and backs, shelf dividers & peg hook side panels.

In-Stock and Ready to Ship!

Wire Shelving

Can be Fixed or Rolling. Provides clean, ventilated storage for electronics, food, or work-in-process. Available in a wide variety of sizes with many options for specific industry applications.

Zinc, Chrome, Stainless Steel & Colors

Wide Span Bulk Rack

These racks have shelves up to 8' wide for storing large cartons and bulky items. Capacities are available up to 1,500# per level with wood, steel or wire deck options.

Easily Adjustable Shelf Levels

Rivet Style Racks

Features a full range of sizes and capacities for many applications. Particle Board, OSB or Wire Decking drops into the steel frame. Can be used for two level mezzanine systems.

Easy Boltless Assembly

Drum Storage Racks

Uses cradles or supports in a heavy duty rack system to hold drums horizontally for storage or dispensing of product. Racks can hold 2 to 16 drums each. Can be configured with a fluid dispensing system.

Store & Dispense from Racks

Archive Storage Racks

These applications require special shelving or rack sizes for the most efficient storage of record storage or bankers boxes. There are a variety of styles to fit different applications.

LIFTING EQUIPMENT

Fork Lifts

Available with electric or propane power for moving and stacking palletized loads. Capacities range from 2,000# to 6,000# with lift heights to 20'. Solid or pneumatic tires for inside or outside operations.

Scissor Man Lifts

Powered travel & lift for easy access to all areas of your facility for installations, repairs, and maintenance. Platform lift heights to 15'. Battery operated, with built-in 110V charger.

Electric Pallet Trucks

Provide fast transportation for heavy pallet loads in larger facilities & warehouses. They are available in walk-behind or ride-on styles, with remote or built-in battery chargers.

Hydraulic Lift Trucks

Transport, stack or position products for easy access. They can be used inside a building or on smooth surfaces outside for unloading trucks. Lift heights to 12 feet, capacities up to 1 ton.

Vacuum Lifters

Provide economical assisted lifting for heavy, awkward or hard to handle loads. Use for moving product to and from workstations or loading pallets. Available with a variety of lifting fixtures.

Order Pickers

Used for man-a-board picking at upper levels of storage rack. Forks support pallet or cart for stacking product. Operator rides in console, with a safety tether allowing movement into racking to pick items.

Hoists

Lift heavier items for placement during assembly or packaging. Capacities from 1/8th ton to 5 tons. We can supply the best support structure for your application and provide special lifting devices.

Installation & Testing Services

Cranes

Used to support hoists for lifting & moving heavy items. Available as single-beam Swivel Jib Cranes, Monorails for straight runs, and Bridge configurations for movement in two directions.

Complete Design & Installation
